DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 7-13, 16-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The preliminary amendment of November 21, 2003 added new claims 7-17 wherein some limitations do not appear to be supported by the specification as originally filed. Specifically note that in the present invention, it appears that the specification as originally filed teaches that "the foot and the type and orientation of the preceptors is converted into data that can be processed by a computer (not shown). The computer turns these data into working instructions for a milling machine (not shown)" (Page 6, lines 22-25). However, claim 7, recite "connection means for receiving and transmitting said image scanned by said scanner to said computer via at least one of a direct connection, a network connection, an internet connection, and a removable

Page 3

Art Unit: 2125

media connection". Claim 7 further recites "said scanned image to be manipulated according to a patient's neurological therapy". There is no antecedent basis in the specification for such limitations. Claims 16, recites "transmitting said scanned image to said computer means via at least one of a wired and a wireless connection". Again, there is no antecedent basis for these limitations. Claims 13 and 17, recite "said markings on said proceptors include data referring to at least one of a depth, a slope, a dimension, and a surface texture of at least one of said proceptor and said therapeutic insole, whereby said arrangement enables a processing of said insole into a near-net final form". There is no antecedent basis for these limitations in the specification.

2. Claims 1, 7-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1, 7, and 14 recites "in accordance with patient's predisposition". Claim 14, further recites "a therapeutic predisposition of said patient". The metes and bounds of "patient's predisposition" and "a therapeutic predisposition of said patient" cannot be readily determined. Claims 11-12, recite "reflect proceptor meaning"; claims 13 and 17, recite "a near-net final form". Again the metes and bound of "reflect proceptor meaning" and "a near-net final form" cannot be readily determined.

The claims are replete with indefinite and/or functional language not supported by the recited structure. The above listing is exemplary of the types of errors present Application/Control Number: 10/719,646

Art Unit: 2125

and not necessarily an exhaustive listing. Therefore, please review the claims and amend accordingly for compliance with 35 USC 112, second paragraph.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning communication or earlier communication from the examiner should be directed to Zoila Cabrera, whose telephone number is (571) 272-3738. The examiner can normally be reached on M-F from 8:00 a.m. to 5:30 p.m. EST (every other Friday).

If attempts to reach the examiner by phone fail, the examiner's supervisor, Leo Picard, can be reached on (571) 272-3749. Additionally, the fax phones for Art Unit 2125 are (571) 273-8300. Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist at (703) 305-9600.
